HERBERTS DUMMY RUN By Mikro-Gen

"I've lost my Muummmmy", Herbert the baby has wandered off in the department store and he is lost! His mummy is at the lost and found and Herbert must get to her by 5.30 (closing time). To achieve this you must complete the adventure as well as completing the many and varied arcade sequences. Ropes and lifts can be used, and objects such as Tennis racquets have a use too! Herbert is rewarded by Jelly babies. Keys are definable.

SLURPY By Kebab's brother Garry

Slurpy dwells in the depths of the caves of Gluton, Slurpy has a large snout with extraordinary sucking powers and an enormous appetite! He will eat anything that gets within sucking distance, his main food is the blue glowbug. When he eats all of these he moves to the next cave. Red glowbugs are fatal unless spat out very quickly, Gold glowbugs are rare and give Slurpy extra strength. No creature must touch Slurpy's body or he will die. If an earthquake starts Slurpy must eat all the glowbugs as quickly as he can. Use joystick to move Slurpy, fire button to spit or change direction.

BLACK HAWK By Chub's brother Dean

Pilot the Black Hawk across enemy territory knocking out enemy planes and tanks, gun positions, rocket launching sites, power cables, railway lines, radar, barbed wire and ultimately the airfield. Use your onboard computer for attack and defence modes. Arcade action and strategy.

MAD DOCTOR By Clive's brother James

Strudelberg is the home of Dr Franz Johann Blockenspiel, he lives alone in his castle devoting time to the creation of ... life! Yes old FJB is a bodybuilder, but hardly of yer Arnie Schwarzenickers kind! He builds bodies from bits of other bodies. The object of the game is to create a living creature, you must collect suitable bodies, operate on them and bring them to life. Avoid attracting the villagers attention. Once a monster is created you must take it to the lightning hall for that life giving burst of static.
