FRANTIC 3D
FLIGHT COMBAT
SIMULATION

Strap yourself into the cockpit of the latest Soviet fighter - the MIG-29 Fulcrum - and prepare for the most amazing combat experience of your life.

You'll have to be quick to choose from the sophisticated weaponry at your disposal, arm it and then lock on your target and FIRE! Use bombs and ground attack missiles on tanks and other vehicles, heat seeking air and other missiles on enemy planes and to air missiles on enemy warheads when the going just gets too tough!

All the time you're doing this you've got to duck and weave thru the enemy fire and watch out for the better aircraft guns - you've gotta be the best!

CONTROLS

This game is compatible with KEMPSTON interfaces and SINCLAIR ports 1 and 2. You can also play using keys if you go to the DEFINE KEYS option on the start menu. To select any option, just press the appropriate number key.

Press **0** to start the game.

Press **BREAK** to pause the game – you can then press **1** to continue or **2** to abort your mission.

GAMEPLAY

You have several different weapons at your disposal. During the game press the space key to arm the next weapon on the indicator. The number below each weapon shows how many you have left – when it hits zero then you've run out, but you can always pick up more from the supply parachutes.

Nuclear warheads can be picked up occasionally from supply parachutes – they have **H** (for Hydrogen Bomb) on them for identification. When you have a H-Bomb, press **FIRE** to drop it and it will destroy all visible enemies.

HINTS AND TIPS

- * Helicopters can only be shot down with heat-seeking missiles (The third set of weapons)
- * Fly into falling supply parachutes to pick them up.
- * Be sure not to run out of fuel. Watch your fuel gauge and pick up fuel parachutes to be sure.
- * Watch your distance indicator to see how far thru a level you are. (The gauge with **S** at the start and **F** at the finish.)
- * Duck and weave so that the enemy don't have a chance to lock their sights onto you.
- * Pick up the **B** parachutes for bonus points on the **BONUS LEVELS**.

David and Richard Darling first started writing computer games when they were in their early teens and still at school. They duplicated the cassettes themselves and sold them by mail order, taking small advertisements in magazines.

From these beginnings David and Richard became contract programmers. They wrote and sourced games for major software houses, and many of these games were major best sellers.

In October of 1986 the Darlings set up CodeMasters, their own company. From the beginning they were determined to sell only the best possible games at the lowest possible price. One title, **BMX SIMULATOR**, when on to become one of the worlds best selling games.

In less than a year, CodeMasters had a string of Top Ten hits to its name. The company was the best selling software house in Britain. David and Richard are now 22 and 21 years old, and are determined to continue what they do best, producing top selling computer games.

ROCKSTAR ATE MY HAMSTER

Ever wanted to make it big? Here's your chance. Choose your stars, make all the decisions and try to hit the big time!

Pick a band from the 50 different rock stars supplied with the game and try to guide them to the heights of commercial success within a year! Can you arrange recording deals, shoot stunning videos, compete with the major acts like The Boring Old Gits from the Sixties? Will your album go platinum? Is your band a one hit wonder? It's all there in **ROCKSTAR**, the music industry management game....

'very addictive and fun to play ... buy ROCKSTAR and you will be onto a winner' 92% Rated –

Andrew Banner, Computer Gamesweek
